Szigetszentmiklós, block of flats
(the original building may have been altered for educational purposes)

Designer: Fóris Viktória

The lowrise building is located in a suburban area of the city near the river Danube. It forms part of a complex of many similar houses in its immediate surrounding, in a quiet are.
There are two flats for every storey and a garage in the basement. The roof space in unused.
Unlike the rendering the building to be designed has to have at least 5 stories above the basement.
